Art Unit: 1724

1. Claims 1-37 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-37 are allowed because the prior art of record fails to teach, disclose, or fairly suggest a method for treating liquid comprising the combination of steps of: directing a stream of liquid into a cyclone apparatus having an inlet closed to the atmosphere and submerged outlet, and forming a central portion substantially evacuated of gases to create a near vacuum condition within the cyclone apparatus, as recited in independent claims 1, 14, 23 and 30. It is submitted that U.S. Patent No. 6,190,543 to Christiansen discloses treating fluid in a cyclonic separator, including separating gas via a central vortex, but Christiansen does not suggest submerging the outlet of the cyclone and closing the inlet to the atmosphere, as recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
